

JUNE 19 - 22, 2023

NORTH DAKOTA TEACHERS BECOME STUDENTS OF THE OILFIELD

The Teacher Education Seminar is open to teachers and guidance counselors who are currently practicing full time in a North Dakota public or private school. Teachers from South Dakota and Montana who are near oil and gas development may also apply.

The cost of the seminar itself is free (attendees are responsible for the cost of the professional development credit) and includes:

All course materials;
Three nights lodging on the BSC campus; and,
Most meals in conjunction with the seminar.
The application deadline is May 1, 2023.

Registration is limited to 50 people

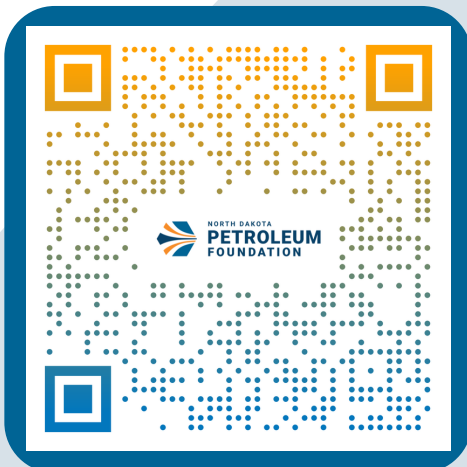

WHERE

1600 Canary Ave
Bismarck, ND

WHY TEACHERS SHOULD ATTEND

EARN CREDITS

Participants will be eligible for two professional development credits from MSU, NDSU or UND. These credits may be used for general teacher license renewals. The university will charge a fee to participants wanting the optional credit. Please note this is a repeat course and past participants are not eligible for repeat credit.

EXPLORE AND LEARN

Delve deep into the oil and gas industry from its prehistoric beginnings to the skills, technology and education it takes to recover it and the ways it is important to you. Topics include:

- Petroleum geology - Why is petroleum found in the rocks of western North Dakota?
- Drilling, producing and refining oil and gas and why is it important to me?
- Career exploration in the energy industry.
- History of oil and gas in North Dakota.
- Paleontology of the Williston Basin.
- Oil and the environment - Can they coexist?

Plus, attendees get a rare opportunity to tour a drilling rig, production site, and more.
